

Bluecrow Projects Ltd

Shopfitting, Refurbishment & Project Management

Our first collaboration with Bluecrow saw the conversion of a tired office space into a bright and airy working environment. This unusual project, for a software company designing products for the restaurant industry, merged workspace and hospitality typologies; a full commercial kitchen enables the in-house chef to cook lunch for the 30 strong team daily.

The Bluecrow team have been excellent to work with from tender to completion and there has been a shared ambition for the highest quality in every aspect of the project. We are extremely happy with the resultant fit-out and look forward to working together again in the near future.

PROJECTS OFFICE, James

We have built a very strong relationship with Bluecrow over the last 5 years, working on a number of Japan Centre and Shoryu projects together. Most recently we completed Ichiiba, Europe's largest Japanese foodhall in Westfield London. Bluecrow were brought on board very late in the project, and they quite literally had to hit the ground running; in my experience something few fit-out companies could do successfully. We met with a number of significant challenges on site but each time Bluecrow overcame them, with all build teams involved working closely and effectively together as one team. The end result was an outstanding build, that proved cost effective and delivered on time.

Bluecrow have a very good bunch of guys and girls working for them. This makes it a pleasure to work with them, no matter who is project managing, site managing etc. They really do care about their clients, and this is for me what singles them out.

JAPAN CENTRE

As designers we have come to realise the importance of working with good contractors who understand the vision of the project and can deliver a product to a high standard. Blacksheep working with Bluecrow have successfully delivered 2 restaurant projects that not only look good but have a certain quality that can only be felt. We look forward to working with Bluecrow in the future.

BLACKSHEEP UK, Bill

We have worked with Bluecrow on both our restaurants, The Palomar in 2014 and The Barbary in 2016. They have been professional, courteous and fair on every level. The work as always been on point and rectified if anything is ever remiss. But more than that, we like and respect them all enormously on a personal level and are really a joy to work alongside.

THE BARBARY, Layo

We've had the pleasure of working with the Bluecrow team on the last four of our restaurant projects. They are very professional and well organised, as one would expect, and this is reflected in their time management and high quality of craftsmanship. They have a can do attitude, work hard to get things right for the client, and just as importantly go the extra mile to build good relationships with landlords.

They are innovative when it comes to on-site problem solving, and with this hands on approach to ensuring design details are refined, the finishes and overall fit-out build is of a very high standard. I would highly recommend Bluecrow to any restaurateur.

SHORYU

Dear Simon, Last night Bill and Granger and Co won the Conde Nast Traveller Innovation and Design Award in the category Gourmet. We shared the award with the Delaunay. We are completely thrilled about this! Thank you for yours and your team's work on the restaurant. This is a wonderful validation of our efforts to create a fabulous restaurant! Congratulations, and thank you enormously for your commitment to and hard work creating Granger and Co.

GRANGER & CO, Natalie

We worked with Bluecrow Projects on the fit-out of our 2nd restaurant on Brick Lane during the summer of 2016. Working the Bluecrow Projects was a pleasure. They quoted and carried out the work both efficiently and professionally. The build was relatively stress free and came in on time and budget. I would have no hesitation to work with them again and in recommending Bluecrow Projects to other clients.

BLANCHETTE EAST, Maxime
