

ARABICA

Bluecrow began working on the empty shell which would become Arabica KX, set in the retail unit of Aga Khan University. Working alongside designers Gundry & Ducker the extensive fit-out included all fixtures and fittings, key materials used throughout the project included cast concrete to clad the bar, the bathroom sinks, and external features outside.

Stained iroko makes up the extensive joinery throughout the restaurant, ranging from wall panels, bar plinths and the large floor to ceiling bespoke shelving, right through to the bathrooms.

Things we particularly liked were the display shelving on the entrance to where the customer walks in, the stained iroko unit with sign written light boxes highlighting ingredients for sale and textured concrete skirting.

When it comes to shopfitting, Bluecrow specialise in the restaurant, bar and retail sectors. We have the confidence, knowledge and expertise to deliver your vision on time and within budget.
