

# BUN HOUSE

Bluecrow started in the heart of china town. A new site for The Bun House, following on from the success of their first restaurant in Greek Street. Plasterers and designer worked in tandem to create a bespoke plastered finish to the walls to gives an authentic weathered aesthetic look which works well with the whitewashed exposed brickwork.

The project which was an 8 week fit out, is spread across 3 floors with seating on the ground floor and first floor with a large basement kitchen. Dark stained oak and brass features from the service areas to the seating. While the floors are finished with terrazzo and mosaic tiles in the signature bun house colours.

Special credit deservedly goes to Brockley Tile and Stone who laid the individual mosaics in the basket weave pattern on the ground floor.

When it comes to shopfitting, Bluecrow specialise in the restaurant, bar and retail sectors. We have the confidence, knowledge and expertise to deliver your vision on time and within budget.
